

AutoParts Pro - EV Components Catalog 2026

Specialized electric vehicle components for battery safety, thermal management, and charging reliability across popular EV platforms.

Battery & Power

Part #: BMS-210 | Battery Management Sensor Module

Description: Monitors cell voltage and temperature with high sampling accuracy. Supports balancing commands and fault diagnostics.

Price: \$219.99 | Availability: In Stock

Part #: HV-045 | High-Voltage Contactor Set

Description: Sealed dual-contactor kit rated for 450A continuous current with arc suppression for safe battery disconnect.

Price: \$189.99 | Availability: In Stock

Charging System

Part #: OBC-110 | Onboard Charger 11kW

Description: Direct replacement onboard charger with thermal pad kit and mounting bracket. 96% peak conversion efficiency.

Price: \$649.99 | Availability: Low Stock

Part #: CCP-022 | Charge Port Lock Actuator

Description: Weatherproof actuator ensuring secure connector lock and smooth release cycles in sub-zero climates.

Price: \$74.99 | Availability: In Stock
